Protocol of suspected COVID-19 cases' management

1. Provided coordination with the local health authorities (hospitals, emergency services).
The Event medical service must contact the local hospital and/or emergency medical services to inform them of the Event, and ensure they have the capacity to handle trauma patients during the pandemic.
2. Identified a physician to be in charge of suspected COVID-19 cases (COVID doctor).
In coordination with local health services and/or in accordance with applicable rules, this doctor shall be responsible for managing any clinical suspicion of COVID-19.

COVID doctor's duties:

- provide a face mask (FFP2 type) to anyone who is sick or has suspicious symptoms;
 - comply with applicable rules regarding mandatory protective equipment for medical personnel when dealing with COVID-19 suspected patients (FFP2 mask, gloves, visor or protective glasses, coveralls).
3. Management of a suspected COVID-19 case;
 - all persons involved in the Event (including Event staff and team members) are requested to signal any suspicion of COVID-19 immediately to the Event medical services.

Suspected cases are identified based on the following symptoms:

- Body Temperature $> 37,5^{\circ}$
 - Sorethroat
 - Cough
 - Cold
 - Any other symptoms regarding respiratory tract
 - Anosmia and/or Ageusia
- the Event medical services will contact the COVID doctor to manage the follow-up with the suspect patient; all suspected patients are put in preventive isolation till a swab has been full-filled.
 - the management of clinical cases will be carried out in agreement with the local or regional health services, and in accordance with national health rules. A pharmacy located next to the arrival area has been contacted and made responsible for the immediate execution of swabs for any suspicious cases.
 - the identification of contact cases with a confirmed COVID-19 case (close contacts and low-risk exposure contacts) will be the responsibility of the COVID doctor, in coordination with the team doctor and the competent health authorities;

ASSOCIAZIONE SPORTIVA DILETTANTISTICA

- the implementation of the initial clinical examination protocol, and referral of the patient to the nearest COVID centre is the responsibility of the COVID doctor;
 - In case of positive test, here there are the criteria for identifying contact cases:
 - Close contacts: a person who lives in the same home as a COVID-19 case; a person who has had direct physical contact with a COVID-19 case (e.g. handshake); a person who has had unprotected direct contact with secretions from a COVID19 case (e.g. touching used paper handkerchiefs with bare hands); a person who has had direct (face-to-face) contact with a COVID-19 case, at a distance of less than 2 meters and at least 15 minutes; a person who has been in an enclosed environment (e.g. classroom, meeting room, hospital waiting room) with a COVID-19 case in the absence of suitable PPE; a person who traveled seated by train, plane or any other means of transportation within two seats in any direction relative to a COVID-19 case; the travel companions and the staff assigned to the section of the plane / train where the index case was sitting are also close contacts.
Close contacts must follow a self-monitoring regime for at least 5 days wearing appropriate PPE required by the legislation (ffp2 type mask) and undergo a swab in case of the appearance of symptoms.
 - Low risk contacts: a person who has had direct (face-to-face) contact with a COVID-19 case, at a distance of less than 2 meters for less than 15 minutes; a person who has been in an enclosed environment (e.g. classroom, meeting room, hospital waiting room) or who has traveled with a COVID-19 case for less than 15 minutes or wearing appropriate PPE.
Low risk contacts are not obliged to self-monitor or to wear the required PPE.
 - **Covid Doctor will take care of identifying all the high and low risk contacts had by the Covid-patient, also through specific information asked to the patient himself, whether he/she belongs to a team or is a member of the organization or the competition staff**
4. Decision-making after confirmation of a COVID-19 case.
- In the event of a confirmed case of COVID-19, the COVID doctor shall report all relevant information to the Event organiser which shall be responsible for taking the appropriate measures for the Event upon due consultation of national health authorities. The Event organiser shall consult the UCI and representatives of riders and teams prior to confirming the decisions regarding the Event. Such decisions shall not concern which persons shall be quarantined, which remains under the sole competence of the COVID doctor and/or national health authorities.
 - During the Grands Tours In the event of a confirmed case of COVID-19 within a team (riders or team members), by antigenic test confirmed by a PCR test, the decision of possible isolation will be taken in a collegial way by the physician of the concerned team, the COVID doctor of the event and the UCI medical director on the available clinical elements. The decision will be taken by a majority of the panel. The conclusions of the medical expertise will be send to the UCI and organisers.
